A product bundle that includes everything you need for the perfect lace: lace adhesive, lace tint, wig caps, and application brushes. End your shopping trip by getting everything at once with our convenient bundles.

What's included...

SALE

UP TO 50% OFF!

PREP

- BRAID YOUR NATURAL HAIR FLAT OR MOLD IT BACK,
BACK,
THEN APPLY A WIG CAP.
- CLEAN YOUR HAIRLINE WITH ALCOHOL OR MICELLAR WATER TO REMOVE OILS.
APPLY SCALP PROTECTOR AND LET IT DRY FOR 1–2 MINUTES.
- TINT THE LACE (SPRAY, POWDER, OR KNOT TINT) TO MATCH YOUR SKIN TONE.
- PRE-PLUCK THE HAIRLINE IF NEEDED FOR A SOFTER LOOK.

Tips:

glue wig cap around hairline, (not on top of hairline) and when dry cut the thick band to make it flat, apply more glue if necessary when it's dry use skin matching powder to match cap with skin

PLACE & TRIM THE LACE

- FIT THE WIG ON YOUR HEAD AND ADJUST THE EAR TABS UNTIL IT SITS FLAT.
- LIFT THE WIG BACK OFF YOUR FOREHEAD AND TRIM LACE IN ZIG-ZAG MOTIONS.
 - MAKE SMALL TABS OR NOTCHES AROUND CURVES TO HELP IT LAY FLAT.
 - LEAVE EAR SECTIONS FOR LAST, TRIMMING CAREFULLY.

tip:

look closer at the image, the zigzag hairline will help greatly with the melt

ADHESIVE & MELT

- CHOOSE ONE METHOD: LACE GLUE (LONGER HOLD) OR SPRAY/GEL (SHORT-TERM HOLD).

IF USING GLUE

- APPLY A VERY THIN LINE OF GLUE JUST IN FRONT OF YOUR HAIRLINE.
- SPREAD INTO A CLEAR, EVEN FILM; DRY UNTIL TACKY AND CLEAR.
- REPEAT 1–2 MORE THIN LAYERS, DRYING EACH UNTIL CLEAR
- PULL LACE FORWARD INTO TACKY AREA AND PRESS WITH A COMB TAIL.
- APPLY ELASTIC BAND FOR 10–15 MINUTES TO MELT.

IF USING SPRAY/GEL

- SPRAY A THIN COAT ALONG HAIRLINE; BLOW-DRY ON COOL UNTIL TACKY
- SET LACE INTO TACKY AREA AND PRESS WITH COMB TAIL.
- MIST LIGHTLY ON TOP OF LACE EDGE FOR EXTRA HOLD.
 - TIE DOWN WITH ELASTIC BAND FOR 10–20 MINUTES.

REFINE THE HAIRLINE

- REMOVE BAND AND CHECK EDGES; ADD MORE GLUE PRODUCT IF ANY SPOTS LIFT
- TAP SKIN-TONE POWDER THROUGH LACE TO ERASE VISIBLE LINES.
- HOT-COMB THE FRONT BACK AND SMOOTH FLYAWAYS WITH WAX/MOUSSE.
- ADD BABY HAIRS ONLY IF DESIRED

ADD MELT SPRAY AND RE APPLY THE BAND FOR AN EXTRA UNDETECTABLE MELT

REMOVAL

- FOR GLUE: USE LACE ADHESIVE REMOVER, SATURATE, WAIT, THEN LIFT GENTLY

- FOR SPRAY/GEL: WATER OR MICELLAR SOLUTION USUALLY RELEASES IT

- NEVER RIP THE LACE OFF—ALWAYS RE-WET AND GO SLOWLY.

PRO TIPS & TROUBLESHOOTING

- WHITE CAST → PRODUCT NOT DRY OR TOO THICK. USE THINNER LAYERS, DRY FULLY.

- RIPPLES → CUT SMALL NOTCHES IN LACE; WORK IN SECTIONS.

- LIFTING CORNERS → ADD A SMALL DAB OF ADHESIVE AND RE-TIE BAND.

- OILY/SWEATY SKIN → WIPE WITH ALCOHOL, USE SCALP PROTECTOR, ADD EXTRA GLUE LAYERS.

- SENSITIVE SKIN → PATCH TEST PRODUCTS; SPRAYS/GEL MAY BE BETTER.

- SHINE → FINISH WITH A LITTLE MATTE POWDER.

QUICK

QUICK CHECKLIST

- ✓ SKIN CLEAN & PROTECTED
- ✓ LACE TINTED AND TRIMMED ZIG-ZAG
- ✓ ADHESIVE APPLIED IN THIN, CLEAR LAYERS
- ✓ LACE PRESSED IN WITH COMB TAIL
- ✓ ELASTIC BAND TIED 10–20 MINUTES
- ✓ POWDER APPLIED IF NEEDED FOR SEAMLESS MELT
- ✓ RE APPLY BAND WITH MELT SPRAY FOR THAT SEAMLESS MELT

Thank you for coming!

We would like to express our sincerest gratitude for purchasing our E-book!.
